

# **Calla Lily - Zantedeschia**

Beautiful and very popular cornucopia-shaped flowers come in white, yellow and pink. The flowers rise from spotted heart-shaped leaves.

## **Location**

Morning sun. Avoid hot afternoon sun.

## **Plant**

Callas grow best in well-drained soil improved with Canadian peat moss and compost. Plant rhizome 4 inches deep and 12 inches apart. Callas do best in pots, and can be started indoors for earlier flowering.

## **Flowering**

Late spring into summer

## **After Care**

Dig rhizomes after leaves yellow, if planted in the ground, and store in vermiculite in a cool place (40-50 degrees). If grown in a pot, let the soil dry and store in the pot in a cool place.
